

## Support system

### Unistrut

- Unistrut is a rigid metal construction system which is a time and money saving alternative to conventional support methods.
- Unique "Weldless" Connection:
  - ① Hex-head bolt connects fitting to channel as it is threaded into spring nut.
  - ② Chamfer in the nut eases starting of the bolt, nut teeth create a strong vice-like grip when tightened against the inturred channel edges
  - ③ Channel edges and the nut's tapered grooves act as guides to provide fool-proof alignment of connection
  - ④ Nut teeth grip the channel's inturred edges, tying the channel sides together in a "box" configuration for added strength
  - ⑤ Spring allows precision placement anywhere along the channel length, then holds the nut in position while the connection is completed.

## Brackets system

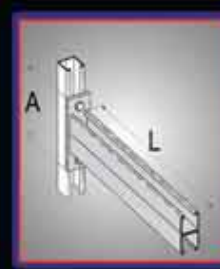

NOVO U-Channel bracket

NOVO BRACKET		
Type	L(mm)	A(mm)
B-225	225	90
B-350	350	90
B-475	475	90
B-555	555	90
B-640	640	130

I Beam bracket

I Beam bracket		
Type	L(mm)	A(mm)
AS21	210	90
AS31	310	110
AS41	410	130
AS51	510	145
AS61	610	165
AS71	710	195
AS81	810	195
